

# MVA Ireland: A unique combination of skills

We have worked in Ireland since 1976, strengthening our presence by opening a new Dublin office in 2005. We are now one of the largest transportation consultancies in the country, with a broad client base.

Our staff are experienced in a variety of fields including engineering, transport planning, social development and environmental planning, enabling them to develop well balanced and unique approaches to address transport issues.

We offer a full range of transport related services from the Dublin office including:

## Transport Planning Policy & Strategy

- Developing a thorough understanding of transport issues;
- Creating innovative transport solutions from local and international experience;
- Recommending integrated transport solutions sensitive to local social and environmental concerns.

## Public Transport Planning

- Comprehensive understanding of Transport 21 Strategy;
- Independent advice over the full range of mass transit options;
- Understanding the relationship between quality of service and attracting patronage;
- Public transport modelling to help predict future outcomes;
- Forecasting revenue and reviewing financial arrangements for new infrastructure.

## Transport Schemes

- Understanding local transport and planning policy;
- Appraisal of accessibility potential and challenges related to development sites;
- Developing transport master plans;
- Integrating site accessibility with broader area accessibility requirements;
- Movement strategies focused on anticipated travel patterns of future site occupants;
- Providing a package of sustainable travel choices for future users.

## Travel Demand Management

- Appraising sustainable travel potential of an existing or new developments;
- Understanding travel behaviour and people's reasons for travelling;
- Developing a tailored package of travel measures to meet mode share targets;
- Marketing of travel plans;
- Keep the momentum of mobility strategies going.

## Transport Modelling

- Transport modelling on local, regional and national level;
- Ability to review/update existing models and also to develop new models from 'scratch';
- Single mode or multi modal transport models;
- In depth understanding of Dublin Transportation Office (DTO) Multi Modal Model;
- Key tool in development of transportation strategies.

## Walking and Cycling

- Making existing and new developments accessible on foot, by bicycle and for the mobility impaired;
- Integrating pedestrian and cycle movements with mechanised modes of transport;
- Identifying pedestrian and cycle desire lines and movement patterns;
- Providing safe road crossing;
