

# MVA Consultancy Manchester Office

MVA Consultancy's Manchester Office is centrally located on the 25th floor of City Tower, part of Piccadilly Plaza, Manchester city centre.

Pedestrian access to the office is through the main reception and security desk for City Tower, which is manned 24 hours per day. During the day, entry can be either from Piccadilly, next to the bus station, or from York Street. Wheelchair access to the building from street level is via the goods lift which is accessed through the loading bay on York Street.

City Tower is particularly well served by public transport. There are major stops for bus, tram, and local and national train services all very close or within walking distance. The following paragraphs will deal with each mode in turn.

At the base of City Tower is Piccadilly Gardens Bus Station and Piccadilly Gardens tram stop is next to this. Piccadilly Railway Station is a five to ten minute walk from City Tower, and provides a wide variety of services, both express and stopping, to a number of destinations including Manchester Airport. Victoria Railway Station is a 10-15 minute walk or five minutes by tram, and serves a number of more local destinations with mostly stopping services.

Limited cycle parking is provided on the car deck. This is in the form of 12 concrete 'toast rack' style spaces for the whole of City Tower. Access to this area is via the same spiral ramp used by vehicles to access the car deck. To access the car deck cyclists must pass a security gate which does not guarantee secure parking.

Car parking varies widely in price, from £10/day for a very close secure multi-storey car park, to £2/day for a 10-15 minute walk and relatively low security surface car parking.
